

@top-left-corner

@top-left

@top-center

@top-right

@top-right-corner

@left-top

@right-top

Specify the border to the region

In CSS, the `@page` rule allows for targeting of specific regions of a page (e.g., `@top-left`, `@bottom-right-corner`). Such rules also allow you to assign content, borders, text alignment, and background colors to these regions for all instances in your document.
