

Trimming text at the end of line

Specify whether to trim the text or not. If `none` is specified to `-ah-text-justify-trim`, the text is not trimmed. Japanese full-width parentheses, middle dots, and punctuations are also trimmed by specifying `punctuation`. Spaces between Hiragana and Katakana are trimmed by specifying `kana`, spaces between Kanji and Kana are trimmed by specifying `ideograph` and spaces between Western words can also be trimmed by specifying `inter-word`.

`none`

(あいうえお。かき・
くけこ)

`punctuation`

(あいうえお。かき・ <
けこ)

`punctuation-except-fullstop`

Same as 'punctuation', but the two letters of U+3002 (。), U+FF0E (。) are excluded.

(あいうえお。かき・ <
けこ)

`punctuation-except-middledot`

Same as 'punctuation', but middle dots of U+30FB (・), U+FF1A (:), U+FF1B (;) are excluded.

(あいうえお。かき・ <
けこ)

`none`

さんぶるとサンプル、ひら
がなとカタカナ

`kana`

さんぶるとサンプル、ひらが
なとカタカナ

`none`

追い込みの処理を行うかど
うかを指定します。

`ideograph`

追い込みの処理を行うかど
うかを指定します。

`none`
