

Annotations in PDF document

You can create annotations in PDF by specifying `-ah-annotation-type`. The types of annotations available are text annotation ('Text'), free-text annotation ('FreeText'), rubber-stamp annotation ('Stamp') and file-attachment annotation ('FileAttachment'). An author, title, content, display when the PDF is opened and icon of the respective annotations can be specified.

This sample specifies a title (`-ah-annotation-title: Annotation;`), an author (`-ah-annotation-author: Antenna House`) and contents (`-ah-annotation-contents: Sample;`).

-ah-annotation-type: Text;

The display state can be specified to 'Text' when PDF is opened by `-ah-annotation-open`. By specifying 'true', it is displayed.

-ah-annotation-type: FreeText;

Font, font size, weight and color can be specified to 'FreeText'

Sample

-ah-annotation-type: Stamp;

Any display styles can be specified to 'Stamp' by `-ah-annotation-icon-name`'. The following shows some of the examples.

`-ah-annotation-icon-name: Draft`

`-ah-annotation-icon-name: ForPublicRelease`

`-ah-annotation-icon-name: TopSecret`

-ah-annotation-type: FileAttachment;

A reference file can be specified to 'FileAttachment' by `-ah-annotation-file-attachment`
