Adding spaces between blocks

Space between blocks can optionally be added with `-ah-margin-after` and `-ah-margin-before`. The following example uses `-ah-margin-after` to add a 2mm space between the blocks for a question and its answer, and a 10mm space between the question–answer pairs.

Question 1. This a block of the question sentence.

Here is a block of the answer sentence to the question 1. Here is a block of the answer sentence to the question 1. Here is a block of the answer sentence to the question 1. Here is a block of the answer sentence to the question 1. Here is a block of the answer sentence to the question 1. Here is a block of the answer sentence to the question 1. Here is a block of the answer sentence to the question 1.

Question 2. This a block of the question sentence.

Here is a block of the answer sentence to the question 2. Here is a block of the answer sentence to the question 2. Here is a block of the answer sentence to the question 2. Here is a block of the answer sentence to the question 2. Here is a block of the answer sentence to the question 2. Here is a block of the answer sentence to the question 2.

Question 3. This a block of the question sentence.

Here is a block of the answer sentence to the question 3. Here is a block of the answer sentence to the question 3. Here is a block of the answer sentence to the question 3. Here is a block of the answer sentence to the question 3. Here is a block of the answer sentence to the question 3. Here is a block of the answer sentence to the question 3.

Question 4. This a block of the question sentence.

Here is a block of the answer sentence to the question 4. Here is a block of the answer sentence to the question 4. Here is a block of the answer sentence to the question 4. Here is a block of the answer sentence to the question 4. Here is a block of the answer sentence to the question 4. Here is a block of the answer sentence to the question 4.
