

Text alignment with text-align=<string>

Specifying <string> on <table> aligns the position of specified letters, such as a decimal point. The entire string defaults to being right-aligned. If you add `-ah-text-align-string`, you can also specify left-aligned or centered text.

'text-align' and -ah-text-align-string are unset

ABC	100	0.0
AAA.BBB	100000000	0.0001
AAA.BBBCCCC	100000000.12345	9990.0001

'text-align: '.'; and -ah-text-align-string is unset

ABC	100	0.0
AAA.BBB	100000000	0.0001
AAA.BBBCCCC	100000000.12345	9990.0001

text-align: '.'; and -ah-text-align-string: start;

ABC	100	0.0
AAA.BBB	100000000	0.0001
AAA.BBBCCCC	100000000.12345	9990.0001

text-align: '.'; and -ah-text-align-string: center;

ABC	100	0.0
AAA.BBB	100000000	0.0001
AAA.BBBCCCC	100000000.12345	9990.0001

text-align: '.'; and -ah-text-align-string: end;

ABC	100	0.0
AAA.BBB	100000000	0.0001
AAA.BBBCCCC	100000000.12345	9990.0001

text-align: '.'; and -ah-text-align-string: inside;

ABC	100	0.0
AAA.BBB	100000000	0.0001
AAA.BBBCCCC	100000000.12345	9990.0001
