

Column span & row span

The table column can be spanned in horizontal direction by `colspan = "VALUE"`, the table row can be spanned by `rowspan = "VALUE"` in vertical direction. Both can be specified at the same time.

This is an example of a column span in a table.

1-1	1-2	1-3	1-4
number-columns-spanned: 2		2-3	2-4
number-columns-spanned: 3			3-4
number-columns-spanned: 4			
5-1	number-columns-spanned: 2		5-4

This is an example of a row span in a table.

1-1	number-rows-spanned: 2	number-rows-spanned: 5	1-4
2-1			number-rows-spanned: 3
3-1	3-2		
4-1	4-2		
5-1	5-2		5-4

This is an example of a row span and column span in a table.

1-1	number-columns-spanned: 2		1-4
2-1	number-rows-spanned: 2		2-4
3-1	3-2	3-3	3-4
4-1	number-columns-spanned: 3		
5-1	number-rows-spanned: 2
