

Example of Document Information embedded into PDF

The `axf:document-info` is placed as a child of `fo:root`, and its properties are 'name' and 'value', which are required. The value of 'name' must be one of "title", "subject", "author" or "keywords".

```
<fo:root xmlns:fo="http://www.w3.org/1999/XSL/Format"
  xmlns:axf="http://www.antennahouse.com/names/XSL/Extensions">
  <axf:document-info name="title" value="The document title"/>
  <axf:document-info name="subject" value="The document subject"/>
  <axf:document-info name="author" value="The author"/>
  <axf:document-info name="keywords" value="Comma separated keywords list"/>
```
