

## Footnote

This is a sample of footnote. Footnote is placed at the bottom of a page separated from the body text.

The total number <sup>(1)</sup> of working hours per worker <sup>(2)</sup> in 2000 was 1,859, at the 1,800-hour level for the 3rd consecutive year. Although this was largely due to the 40-hour work week system that was implemented in April 1997, the effects of the recession cannot be overlooked.

---

(1) Total working hours = Normal working hours + Overtime working hours.

(2) Offices and factories with 30 employees or more are covered.
