

## Border Style and Border Width

It is possible to draw border lines around the objects. This is a sample that shows the line style and line weight.

`border-after-style="solid" border-after-width="thin"`

---

`border-after-style="solid" border-after-width="medium"`

---

`border-after-style="solid" border-after-width="thick"`

---

`border-after-style="solid" border-after-width="0.5pt"`

---

`border-after-style="solid" border-after-width="1mm"`

---

`border-after-style="dotted" border-after-width="thin"`

---

`border-after-style="dotted" border-after-width="medium"`

---

`border-after-style="dotted" border-after-width="thick"`

---

`border-after-style="dotted" border-after-width="0.5pt"`

---

`border-after-style="dotted" border-after-width="1mm"`

---

`border-after-style="dashed" border-after-width="thin"`

---

`border-after-style="dashed" border-after-width="medium"`

---

`border-after-style="dashed" border-after-width="thick"`

---

`border-after-style="dashed" border-after-width="0.5pt"`

---

`border-after-style="dashed" border-after-width="1mm"`

---

`border-after-style="double" border-after-width="thin"`

---

`border-after-style="double" border-after-width="medium"`

---

`border-after-style="double" border-after-width="thick"`

---

`border-after-style="double" border-after-width="0.5pt"`

---

`border-after-style="double" border-after-width="1mm"`

---

`border-after-style="ridge" border-after-width="thin"`

---

`border-after-style="ridge" border-after-width="medium"`

---

`border-after-style="ridge" border-after-width="thick"`

---

`border-after-style="ridge" border-after-width="0.5pt"`

---

`border-after-style="ridge" border-after-width="1mm"`

---

`border-after-style="inset" border-after-width="thin"`

---

`border-after-style="inset" border-after-width="medium"`

---

`border-after-style="inset" border-after-width="thick"`

---

`border-after-style="inset" border-after-width="0.5pt"`

---

`border-after-style="inset" border-after-width="1mm"`

---
