

Links in PDF

PDF link is classified into two parts, link to the specified position in the PDF document, and link to the external document. The internal-destination property of fo:basic-link indicates to link to the position in the same document. The external-destination property indicates to link to external document. Below shows the example.

Example of a link to internal destination

Refer to [Purchasing Assistance](#) to get more information.

Example of a link to external destination

Purchasing Assistance

If you are end user who wishes to use XSL Formatter yourself, you may purchase from our Reseller or direct from Antenna House.

If you would buy from our Reseller, Reseller will helps you to build system, develop stylesheets and use our products, etc. It depends on Reseller strategy. Please consult with your reseller.

Quality of Products Guranteed

Antenna House has been in the software industry for more than 18 years in quality sensitive Japanese market. We have already established the reputation of high quality of XSL Formatter. When the bug is found in our products, Antenna House will fix the bug immediately and supply revised program through Reseller or directly. See detail in End User License Agreement.

Technical Support from Antenna House

The customers who purchased the End User License of XSL Formatter directly from Antenna House are granted 30 day technical support at no charge by the staff of Antenna House. Antenna House is also able to offer special consulting service, development of stylesheet, etc. Please feel free to contact us.

Looking for Upgrade?

Check our XSL version Update [here](#) or visit our Version Up corner to find out how to add on powerful features like PDF Output, etc.
