

Side floats

Horizontal float direction (vertical float direction in case of the vertical writing mode) to be placed within the column can automatically be adjusted by specifying `axf:float-x="alternate"`. According to the specification, in case of the first paragraph of the column, it will be placed at the end side. In case of the last paragraph of the column, it will be placed at the start side. In case of the other paragraphs, they will be placed at the center. In case of a non-column, it will be placed at the center. `axf:float-x="alternate"` is available in AH Formatter V6.3.

When `<axf:float-x="alternate">` is specified
