

Text alignment with text-align="<string>"

Specifying <string> on fo:table-cell aligns the position of specified letters, such as a decimal point. The entire string defaults to being right-aligned. If you add axf:text-align-string, you can also specify left-aligned or centered text.

No setting of text-align / axf:text-align-string

ABC	100	0.0
AAA.BBB	100000000	0.0001
AAA.BBBCCCC	100000000.12345	9990.0001

text-align="".'" No setting of axf:text-align-string
