Page breaks at even or odd pages from the top of the document

By specifying 'break-after' and 'break-before' with 'even-document' or 'odd-document' will cause page breaks on even or odd pages counting from the top of the document. For more details on break-after break-before, please refer to the Online Manual. This feature is available with Antenna House Formatter V7.3 or later.

Here is another new fo:page-sequence.

Antenna House, Inc.

'break-before="even-page"' is specified for this block. Moves to even-page.

Antenna House, Inc.

'break-before="even-document"' is specified for this block. Moves to even pages counting from the top of the document. This is useful when the content begins on the left page of the spread.。

Antenna House, Inc.

'break-before="odd-document"' is specified for this block. Moves to odd pages counting from the top of the document.

Antenna House, Inc.
