

Column rule

You can draw a ruled line between columns by specifying ‘[axf:column-rule-*](#)’. The color of the column rule can be specified by ‘[axf:column-rule-color](#)’, the length can be specified by ‘[axf:column-rule-length](#)’, the style can be specified by ‘[axf:column-rule-style](#)’, and the width can be specified by ‘[axf:column-rule-width](#)’. In AH Formatter V7.2 or later, a shorthand that sets ‘border-width’, ‘border-style’, ‘color’, and ‘column-rule-display’ using ‘[axf:column-rule](#)’ is effective. On the first page, `axf:column-rule-style="solid"`, `axf:column-rule-width="thick"`, `axf:column-rule-color="#BBFFBB"` are specified to the column rule.
