Adds a page number to the field name

By using 'axf:field-name-suffix-page-number', Adds a page number to the name specified by 'axf:field-name'. 'axf:field-name-suffix-page-number' is available in AH Formatter V6.6.

The unique name can be specified to the form field by 'axf:field-name'. Use 'axf:field-name-suffix-page-number' to create a form in <fo:static-content> and specify a unique name for each page. The page number is appended to the name of the form field on each page.

```
<fo:static-content flow-name="xsl-region-before" >
<fo:block text-align="right">
<axf:form field-submit-method="post" field-submit-coordinates="true">
<fo:block space-before="0.5em">
Text Field:<axf:form-field field-type="text" field-name="InputText-Page"
axf:field-name-suffix-page-number="1"
field-default-text="yyyy/mm/dd"
width="10em" height="1.2em"
background-color="#ff8" border="1pt silver inset" />
</fo:block>
</axf:form>
</fo:block>
</fo:static-content>
```

The name of the form in the first page is "InputText-Page1".

The name of the form in the 2nd page is "InputText-Page2".
