The **format** property is used to convert formatter-generated numbers like page numbers to different counting methods. Antenna House Formatter has extended this property to include many numbering systems and number formats. The **format** property is applied to a page sequence and this document is set to start on page 13 for demonstration purposes.

format="1" (default) page number 13

format="க" (Tamil) page number கயிச

format="I" (Roman) page number XV

format="Ⓐ" (Circled Latin Capital) page number Ⓟ
