# Side floats

The horizontal position of a float within a column (vertical position in case of the vertical writing mode) can be adjusted automatically by specifying `-ah-float-x: alternate`. With `-ah-float-x: alternate`, a float in the first column is placed at the 'end' side, and in the last column, it is placed at the 'start' side. In other columns, it is placed at the 'center'. When there is a single column, the float is placed at the 'center'. `-ah-float-x: alternate;` is available in AH Formatter V6.3 and later.

When -ah-float-x: alternate;
