

Hanging punctuation at the start / end of line

Specifies whether punctuation at the start and/or end of a line may hang outside the line. If `-ah-hanging-punctuation: none`; is specified, hanging punctuation is not applied. If `'start'` is specified, hanging punctuation is applied at the start of a line. If `text-align: right`; or `text-align: justify`; is specified together with the `'force-end'` value, then full-width punctuation that comes at the end of a line is forced to hang. The other settings are explained in this sample. See also `-ah-hanging-punctuation` in the Online Manual to learn more about the corresponding punctuation.

`'none'`

「あいうえ
お、

`'start'`

「あいうえ
お、

`'force-end'`

「あいうえ
お、

`'first'`

The same behavior as `'start'` is applied only at the first line of a paragraph.

「あいうえお」
「かきく

`'allow-end'`

When the target character to be hung comes at the end of a line, it isn't hung when it fits into the line, but it is hung when it does not fit into the line.

あいうえお、
「かきくけこ、

`'last'`

The same behavior as `'force-end'` is applied only at the last line of a paragraph.

あいうえおか
きくけこ、さし
すせそたち
つ、
