

## Trimming the space between full-width punctuation and full-width character

In Japanese, the space between punctuation and character in full-width can be specified by `-ah-punctuation-spacing`. The specified space is applied between the full-width closing parenthesis and opening parenthesis, between the full-width closing parenthesis and full-width non-punctuation, between the full-width non-punctuation and full-width opening parenthesis when `-ah-punctuation-trim: adjacent` is specified. The value can be specified by the absolute or percentage. The default value of the space to trim can be specified by `-ah-punctuation-spacing` in the option setting file. The default value of is `-ah-punctuation-spacing: 50%`.

`-ah-punctuation-trim: adjacent`, without the setting of `-ah-punctuation-spacing`  
(あい「うえお」「かきく」けこ)

`-ah-punctuation-trim: adjacent`, without the setting of `-ah-punctuation-spacing: 1em`  
(あい「うえお」「かきく」けこ)

`-ah-punctuation-trim: adjacent`, without the setting of `-ah-punctuation-spacing: 2em`  
(あい「うえお」「かきく」けこ)

`-ah-punctuation-trim: adjacent`, without the setting of `-ah-punctuation-spacing: 0%`  
(あい「うえお」「かきく」けこ)

`-ah-punctuation-trim: adjacent`, without the setting of `-ah-punctuation-spacing: 50%`  
(あい「うえお」「かきく」けこ)

`-ah-punctuation-trim: adjacent`, without the setting of `-ah-punctuation-spacing: 200%`  
(あい「うえお」「かきく」けこ)
