

**Test of float=inside/outside**

This is an inside-float

This block contains a side float with float="inside". Thus on a right-hand page it should float to the left, on a left-hand page it should float to the right.

This block contains a side float with float="outside". Thus on a right-hand page it should float to the right, on a left-hand page it should float to the left.

This is an outside-float

This block contains a side float with float="inside". Thus on a right-hand page it should float to the left, on a left-hand page it should float to the right.

This is an inside-float

This is an outside-float

This block contains a side float with float="outside". Thus on a right-hand page it should float to the right, on a left-hand page it should float to the left.
