

**Test of clear=inside/outside**

This is an inside-float

This block contains a side float with float="inside". Thus on a right-hand page it should float to the left, on a left-hand page it should float to the right.

This is a block with out. It should not clear any floats.

This block contains a side float with float="outside". Thus on a right-hand page it should float to the right, on a left-hand page it should float to the left.

This is an outside-float

**Block with clear="both" to clear all floats**

This is an inside-float

This block contains a side float with float="inside". Thus on a right-hand page it should float to the left, on a left-hand page it should float to the right.

This block contains a side float with float="outside". Thus on a right-hand page it should float to the right, on a left-hand page it should float to the left.

This is an outside-float

This is a block with clear="inside". It should clear any inside floats but not outside floats.

This block contains a side float with float="inside". Thus on a right-hand page it should float to the left, on a left-hand page it should float to the right.

This is a block with out. It should not clear any floats.

This is an outside-float

This block contains a side float with float="outside". Thus on a right-hand page it should float to the right, on a left-hand page it should float to the left.

This is an inside-float

Block with clear="both" to clear all floats

This block contains a side float with float="inside". Thus on a right-hand page it should float to the left, on a left-hand page it should float to the right.

This is an outside-float

This block contains a side float with float="outside". Thus on a right-hand page it should float to the right, on a left-hand page it should float to the left.

This is an inside-float

This is a block with clear="inside". It should clear any inside floats but not outside floats.
