# Formatter V6.6 New!

Format HTML & XML Into Print and PDF Documents Using CSS3 or XSL-FO

## WAY BEYOND TYPESETTING WAY BEYOND TYPESETTING WAY BEYOND TYPESETTING WAY BEYOND TYPESETTING

Antenna House Formatter is the most powerful **XSL-FO** and **CSS** document formatting software in the industry. The latest release, **V6.6**, is now available with the following features:

- Heavily enhanced CSS functionality
- Supports OpenType Math tables
- New language support for:
  - Amharic
  - Syriac

## Formatting HTML and XML into print and PDF using the power of Antenna House Formatter

### V6.6 Enhancements

The latest Antenna House Formatter V6.6 release is now available with enhanced CSS functionality which includes support for form field creation and footnote breaking with CSS. The previous version introduced support for PDF/A-2, PDF/A-3, and PDF/UA outputs, streaming multimedia within a PDF, and a completely rewritten CGM rendering engine. V6.6 also has added support for MathML 3.0, layered PDFs, embedding multimedia, Indic languages, color gradients, and numerous extensions.

### Format documents for print and PDF using CSS or XSL-FO

Antenna House Formatter V6.6 supports page layouts specified using either CSS (Cascading Style Sheets) or XSL-FO (Extensible Stylesheet Language - Formatting Objects) for formatting documents for PDF and print. Users can select the stylesheet language and content strategy that best suits their business needs.

XSL-FO has long been recognized as the standard for formatting XML for print and PDF and CSS as the standard for displaying HTML on the web. The missing piece for web developers has always been how to go from web/HTML to print and PDF with properly formatted pages and documents. Antenna House Formatter is the solution!

### Overview

The release of V6 introduced a new dimension to document formatting for print and PDF of HTML with CSS by making it possible to float content in multi-column layouts. Now HTML formatted for print and PDF can have all the features of a properly formatted page and all the PDF features customers are looking for.

Formatter can be used for a virtually unlimited number of purposes ranging from formatting technical, training and user documents to formatting books, journals, reports, financial documents such as invoices and statements to formatting documents over the web such as train tickets, contracts and custom reports. Formatter is available either as a standalone or as a server application with powerful API's for integrating into a user's total solution.

### About Antenna House Formatter

Antenna House Formatter is based on the W3C Recommendations for XSL-FO and CSS and has long been recognized as the most powerful and proven standards based formatting software available. It is used worldwide in demanding applications where the need is to format HTML and XML into paged documents. Formatter now offers support for over 60 languages, MathML 3.0, and complex page layout.

*Today Antenna House Formatter is used to produce millions of pages daily of technical, financial, user, and a wide variety of other documentation for thousands of customers in 45 countries.*
