

Suppressing duplicate footnotes within the same page

When the same footnote is allotted at several positions within a same page, using `axf:suppress-duplicate-footnote` prevents them from being duplicated and displayed within the same footnote region. In this page, a duplicated display is controlled with `axf:suppress-duplicate-footnote="true"`.

ABCDE⁽¹⁾

EDCBA⁽²⁾

AH Formatter is a most powerful formatting and printing software ⁽³⁾ using XSL-FO and XML/HTML with CSS⁽⁴⁾.

This software conforms to XSL 1.1⁽⁵⁾, which is a specification for displaying / printing XML documents in a fine manner. Also it supports the page formatting with the layout setting by the CSS Level 3 specification which is currently under formulation in the CSS Working Group.

⁽²⁾ footnote sample 2

⁽³⁾ Depending on the formatting capability, AH Formatter (formatting using XSL-FO and CSS) and AH CSS Formatter (formatting using CSS) are available.

⁽⁴⁾ XSL-FO and CSS cannot be mixed.

⁽⁵⁾ See also [XSL-FO Conformance] in the online manual.

Since axf:suppress-duplicate-footnote is not specified in the second page, the same footnote is duplicated in the footnote region.
