

# Place continuous blocks on the same page

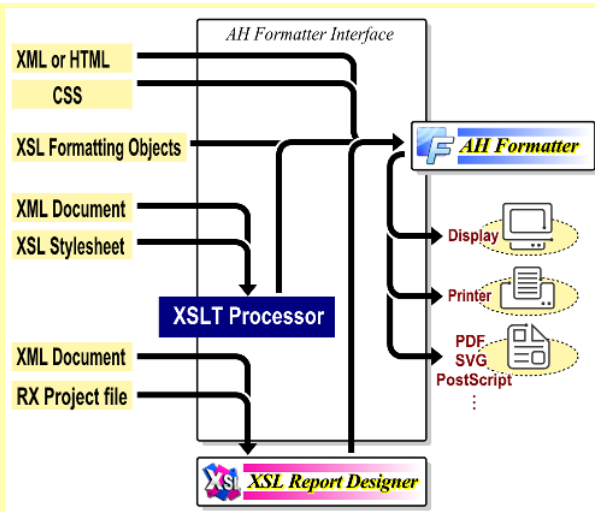

Ordinary, text is arranged from the top of the page and when the text fills up the entire page, the page break occurs automatically. It's possible to place the blocks (including paragraph and figures) in one page by specifying keep-together.

## Blocks with background color with no settings (default value)

### Antenna House Workflow

AH Formatter formats XSL Formatting Objects (XSL-FO), XML with XSL stylesheet, or HTML with CSS. The formatted result will be displayed in GUI and outputted or printed to PDF. (Display and printing are available only with the Windows version).

The work flow is as shown below.

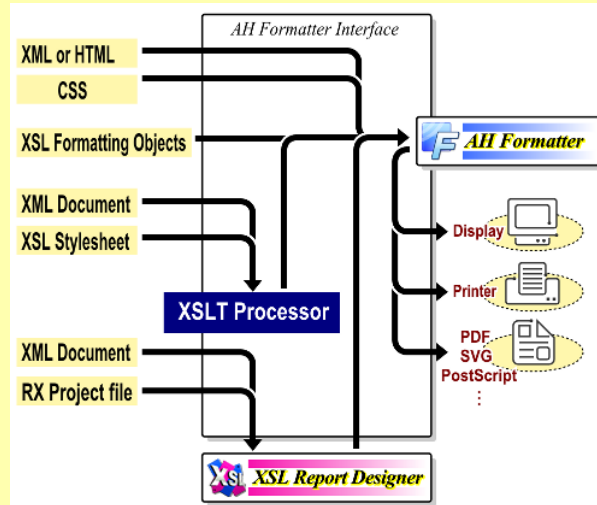

## **Blocks with background color with keep-together.within-page="always" specified**

By specifying keep-together, blocks are placed together in the next one page.
