

Form field

PDF form field can be created by using `<axf:form>` and `<axf:form-field>`. Available field types are: text, push button, check box, radio button, list box, combo box, digital signature, etc.

Text field (field-type="text")

The default text entered in the text field can be specified by 'axf:field-default-text'. Whether the text field is a single line or multiple lines can be specified by 'axf:field-multiline'. The text format and maximum number of characters can also be specified. [axf:field-font-size](#) and [axf:field-text-align](#) properties are available in AH Formatter V6.5 and later.

Text Field:

Text Field (field-multiline="true"):

Text Field (axf:field-font-size="auto"):

Text Field (axf:field-text-align="center"):

Text Field (axf:field-text-align="right"):

Push-button field (field-type="button")

The caption in a push-button field can be specified by 'axf:field-button-face', an icon can be specified by 'axf:field-button-icon', and the layout display can be specified by 'axf:field-button-layout'. Separate captions to be displayed when pushing a button (down) and during rollover (rollover) can be specified. Similarly for an icon. Reset, Submit and URL action types when pushing a button are available by specifying 'action-type'. Also, since this is just a sample, 'Submit' does not work in this sample.

Push Button (URI "https://www.antennahouse.com/"):

Push Button (Submit):

Push Button (Reset):

Checkbox field, radio button field (field-type="checkbox", field-type="radio")

Whether the checkmark is displayed by default can be specified by 'field-checked'. The check mark style can be specified by 'field-checked-style'.

Check Box (field-checked-style="checkmark"): Check Me!

Radio Button (field-checked-style="circle"): Cat Dog

List box field, combo box field (field-type="listbox", field-type="combobox")

The content to display can be specified by `<axf:form-field-option>`. The content should not be empty. The contents in the list box and combo box will on separate lines in the same sequence as the `<axf:form-field-option>`.

List Box:

Combo Box:

Digital Signature field (field-type="signature")

Digital Signature field can be specified by field-type="signature". The contents are empty. The appearance cannot be specified beforehand.

Digital Signature:
