

# Text or graphic in change bar

In Antenna House Formatter, `<fo:change-bar-begin>` can have an `<fo:float>` child. This allows notes and other arbitrary information to be added to each change.

```
<fo:change-bar-begin change-bar-class="abc">
<fo:float float="start">
<fo:block-container width="2.5em" background-
color="lightpink">
<fo:block font-size="0.8em">This is a change log.</
fo:block>
</fo:block-container>
</fo:float>
</fo:change-bar-begin>
```

This is  
a  
change  
log.
