

Form Field

PDF form field can be created by using `<axf:form>` and `<axf:form-field>`. Available field types are: text, push button, check box, radio button, list box, combo box, digital signature, etc.

Text field (-ah-field-type: text;)

The default text entered in the text field can be specified by `-ah-field-default-text`. Whether the text field is a single line or multiple lines can be specified by `-ah-field-multiline`. The text format and maximum number of characters can also be specified. [-ah-field-font-size](#) and [-ah-field-text-align](#) properties are available in AH Formatter V6.5 and later.

Text Field:

Text Field(-ah-field-multiline: true):

Text Field(-ah-field-font-size: auto):

Text Field(-ah-field-font-align: center):

Text Field(-ah-field-font-align: right):

Push-button field (-ah-field-type: button;)

The caption in a push-button field can be specified by `-ah-field-button-face`, an icon can be specified by `-ah-field-button-icon`, and the layout display can be specified by `-ah-field-button-layout`. Separate captions to be displayed when pushing a button (down) and during rollover (rollover) can be specified. Similarly for an icon. Reset, Submit and URL action types when pushing a button are available by specifying 'action-type'. Also, because this is just a sample, 'Submit' does not work in this sample.

Push Button (URI <https://www.antennahouse.com/>):

Push Button(Submit):

Push Button(Reset):

Checkbox field, radio button field (-ah-field-type: Checkbox; -ah-field-type: radio;)

Whether the checkmark is displayed by default can be specified by 'field-checked'. The check mark style can be specified by 'field-checked-style'.

Check Box (-ah-field-checked-style: checkmark): Check Me!

Radio Button (-ah-field-checked-style: circle): Cat Dog

List box field, combo box field (-ah-field-type: listbox, -ah-field-type: combobox)

The content to display can be specified by -ah-form-field-option. The content should not be empty. The contents in the list box and combo box will on separate lines in the same sequence as the -ah-form-field-option.

List Box:

Combo Box:

Digital Signature field (-ah-field-type: signature)

Digital Signature field can be specified by -ah-field-type: signature. The contents are empty. The appearance cannot be specified beforehand.

Digital Signature:
