

PDF Embedding

Antenna House Formatter can use `<fo:external-graphic>` to embed a PDF like an image. Specify as `<fo:external-graphic src="embedded.pdf"/>`. Fillable PDF forms can also be embedded. A PDF is embedded at its original size. Use `'content-height'` and `'content-width'` to scale the image if necessary. A page from a PDF file can also be used as a background image, including as the background of an `<fo:simple-page-master>` and `<fo:page-sequence>`. For more details, see [PDF Embedding](#) in the Manual.

PDF embedding without specifying 'content-height' and 'content-width'

Embedded PDF sample

PDF embedding with specifying content-height="40%"

Embedded PDF sample

PDF embedding with form fields

Text Field (axf:form-field field-type="text"):

Field 1:

Field 2:

This page uses PDF **1** as the background by specifying it in the 'background-image' attribute of the <fo:simple-page-master> object.
