

Barcode

This is an example of embedding barcodes directly in the document as images by using Antenna House Formatter Barcode Generator Option. A barcode font isn't used and a generated image of a barcode (PNG or SVG) is embedded. Data Matrix and PDF417 formats are available from AH Formatter V6.3 R1. Aztec Code formats are available from AH Formatter V7.1 R1. "[Antenna House Formatter Barcode Generator Option](#)" must be purchased separately in order to generate barcodes.
