

Formatter can reference fonts from external sources. Externally referenced fonts are always embedded.

The text in the following block will be in the font Lobster which is referenced from a public dropbox link

This text is in the Lobster font

Code to include external font:

```
<axf:font-face src="url(https://dl.dropboxusercontent.com/u/221516245/Lobster-Regular.ttf)"  
font-family="EXTERNAL-LOBSTER"/>
```
