

Content of a table cell split by a page break

The content of a cell that is being split by a page break can be specified using `-ah-table-cell-repeated-marker`. When `-ah-repeat-cell-content-at-break: true` is specified to a cell and `-ah-table-cell-repeated-marker` is also included in the cell, the content specified by `-ah-table-cell-repeated-marker` replaces the copied cell content. In this example, “(Continued)” is added to the repeated content.

`-ah-repeat-cell-content-at-break` is ‘false’ or is unspecified
