

Table alignment

Text-alignment can be set within a table's tag such as `<td>` which will format the contents of the cell.

text-align: center;

Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table	Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table Cell text in single table
