

# Column width

The table column widths can be specified with either automatic or fixed table layout. Fixed table layout is used only when `table-layout` is `fixed` and `-ah-inline-progression-dimension` (or `width`) is a length or a percentage. Otherwise, automatic table layout is used. `proportional-column-width()` can be used to specify relative column widths. The ability to use `proportional-column-width()` with automatic table layout is an Antenna House Formatter extension.

## Automatic table layout

```
<table style = "-ah-inline-progression-dimension: auto; table-layout: auto;">
```

Column Widths are not specified

Item 1	Item 2	Amount	Content
		Unit: billion yen	
Product A Product B	Model number	680	ABC-DE

The first two columns specify `width: 35mm;`, and the other columns specify `width: 50mm;`.
