

## Pair Kerning in Alphabets

By using a pair kerning value of Western fonts, you may set whether the space between letters should be trimmed or not using: `-ah-kerning-mode: none | pair`. If the value of `letter-spacing` is not 0, it would be regarded as specifying `none`.

Latin script:

TO WALT

TO WALT

Greek script:

ΓΑΜΜΑ

ΓΑΜΜΑ

Cyrillic script:

ТАЙНА

ТАЙНА

The letter-spacing value is non-zero:

TO WALT

TO WALT
