

Display the alternate text of an image

Using '[-ah-display-alttext](#)', specifies whether to display the alternate text of an image. This feature is available in AH Formatter V7.0 or later.

The following specifications are commonly used in this sample.

-ah-alttext: 'this content shows up if the parent image is missing'
src="img/button-none.png" is specified in tag, but the image is missing. The alternate text is displayed instead.

-ah-display-alttext: true: The alternate text is displayed, the image is not displayed.

This content shows up if the parent image is missing

-ah-display-alttext: false: The alternate text is not displayed.

-ah-display-alttext: auto: The value specified by [display-alttext](#) in the Option Setting File is adopted.
