

Double border line thickness

The line thickness of `border-style: double` can be specified by using ‘`-ah-border-double-thickness`’. For instance, the thickness can be specified like `-ah-border-double-thickness: 1pt 1pt 1pt`. The three values in order from left to right are: outside line width, spacing, and inside line width. If a value is omitted, it is regarded as equivalent to the preceding value. Negative values are not available. Borders with double lines are available in Antenna House Formatter V6.3 and later.

`border-style: double`

`border-style: double; -ah-border-double-thickness: 1`

`border-style: double; -ah-border-double-thickness: 3pt`

`border-style: double; -ah-border-double-thickness: 3pt 3pt 3pt`

`border-style: double; -ah-border-double-thickness: 3pt 1pt 3pt`

`border-style: double; -ah-border-double-thickness: 3pt 1pt 1pt`

`border-style: double; -ah-border-double-thickness: 1pt 3pt 1pt`
