

Box shadow

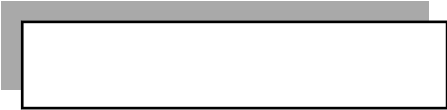

Shadows can be added to a box using 'box-shadow'. For `box-shadow: 10px 10px 10px 10px darkgray`, the values, in order, are: horizontal offset of the shadow; vertical offset of the shadow; blur radius; shadow expansion; shadow color. By adding 'inset' to the value, an inner shadow can be created.

`box-shadow: 10px 10px 0px 0px darkgray`

`box-shadow: 10px 10px 5px 0px darkgray`

`box-shadow: 10px 10px 0px 8px darkgray`

`box-shadow: inset 10px 10px 0px 0px darkgray`

`box-shadow: -10px -10px darkgray`

`box-shadow: 10px 10px dimgray, 20px 20px darkgray, 30px 30px lightgray`
