

Document info properties are added before the layout-master-set

```
<axf:document-info name="author" value="Alex Critchfield, Antenna House"/>  
<axf:document-info name="keywords" value="extensions, document-info"/>  
<axf:document-info name="subject" value="document-info extension"/>  
<axf:document-info name="title" value="document-info extension demonstration"/>
```

- 1 To view document properties format this FO into a PDF
- 2 Open the PDF with Adobe Reader
- 3 In the Adobe Reader File menu select 'Document Properties'
- 4 Select 'Description' and view the document-info items that were set in the FO
