Thickness of double-border lines

The line thickness of border-style="double" can be specified by using 'axf:border-double-thickness'. For instance, the thickness can be specified like axf:border-double-thickness="1pt 1pt 1pt". The three values in order from left to right are: outside line width, spacing and inside line width. If a value is omitted, it is regarded as equivalent to the preceding value. Negative values are not available. Borders with double lines is available in Antenna House Formatter V6.3 and later.

border-style="double"

border-style="double" axf:border-double-thickness="1"

border-style="double" axf:border-double-thickness="3pt"

border-style="double" axf:border-double-thickness="3pt 3pt 3pt"

border-style="double" axf:border-double-thickness="3pt 1pt 1pt"

border-style="double" axf:border-double-thickness="1pt 1pt 3pt"

border-style="double" axf:border-double-thickness="1pt 3pt 1pt"
