

Generating wavy borders

The border of `border-style="wave"` can be specified like `axf:border-wave-form="10 3pt"`. One or two values may be specified. The values in order from left to right are wave form length and line width. Each value may be a number, a length, or 'auto'. Numeric values are proportional to the border width. If a value is 'auto' or omitted, it is regarded as either 6 or 0.125, respectively. Negative values are not available. `border-style="wave"` is available in Antenna House Formatter V6.3 and later.

`border-style="wave"`

`border-style="wave" axf:border-wave-form="auto"`

`border-style="wave" axf:border-wave-form="6 0.125" (= 'auto')`

`border-style="wave" axf:border-wave-form="2"`

`border-style="wave" axf:border-wave-form="5"`

`border-style="wave" axf:border-wave-form="10"`

`border-style="wave" axf:border-wave-form="10 3pt"`

`border-style="wave" axf:border-wave-form="10 5pt"`
