Character string substitution

Character string is substituted by using 'axf:text-replace'. Character strings are designated in pairs. The first character string of a pair is entirely replaced with the second character string. When you want to substitute a character string that includes a space (such as 'Antenna House'), please enclose the string with quotation marks.

Original character string

sample. 1999–2008, sample. sample. Antenna House, sample. sample. Antenna House, sample.

axf:text-replace="2008 2010"

sample. 1999–2010, sample. sample. Antenna House, sample. sample. Antenna House, sample.
