

Character style

Example of specifying an italic typeface, specifying a bold typeface.

This is a **bold** character.

This is an *italic* character.

This is a mixture of ***bold and italic***.

This is a ^{superscript}.

This is a _{subscript}.

This is an underline.

This is an overline.

This is a ~~line-through~~.

This is an example of enclosing text with solid line.

This is an example of enclosing test with dots.

This is an example of specifying red for the text.

This is an example of specifying cyan for the background.

As this example shows, you can modify various styles of the character by specifying one style, or by specifying mixed styles flexibly.
