## Pair Kerning in Alphabets

By using a pair kerning value of Western fonts, you may set whether the space between letters should be trimmed or not. If the value of 'letter-spacing' is not 0, it would be regarded as specifying 'none'.

Latin script:

To WALT
To WALT

Greek script:

ΓΑΜΜΑ ΓΑΜΜΑ

Cyrillic script:

ТАЙНА ТАЙНА

The letter-spacing value is non-zero:

To WALT
To WALT
