Unbreakable words

List the unbreakable words in the content of the 'unbreakable-words' element of the option setting file, using line feed as a delimiter. It is possible to list strings containing spaces and words containing hyphens. The leading and trailing white spaces (U+0009, U+0020) will be discarded. Consecutive white spaces (U+0009, U+0020) are grouped together. See 'unbreakable-words' for details. This feature is available in Antenna House Formatter V7.0 or later.

Example of option setting file:

```
<?xml version="1.0"?>
    <formatter-config>
        <formatter-settings>
            <unbreakable-words>
                Antenna House
                support-team
            </unbreakable-words>
        </formatter-settings>
    </formatter-config>
```

With Antenna House Formatter V7.0 and later, yellow background words are listed in 'unbreakable-words' in the Option Setting File, and you can see the result by formatting this FO.

Antenna House Sample Data, Antenna House, Antenna House Sample Data, Antenna House Sample, Antenna House Sample Data, Antenna House, Antenna House Sample Data, Antenna House, Antenna House Sample Data, Antenna House.
