

# Suppressing duplicate footnotes within the same page

When the same footnote is allotted at several positions within a same page, using '[axf:suppress-duplicate-footnote](#)' prevents them from being duplicated and displayed within the same footnote region. In this page, a duplicated display is controlled with `axf:suppress-duplicate-footnote="true"`.

<sup>(3)</sup> Depending on the formatting capability, AH Formatter (formatting using XSL-FO and CSS) and AH CSS Formatter (formatting using CSS) are available.

<sup>(4)</sup> XSL-FO and CSS cannot be mixed.

<sup>(5)</sup> See also [XSL-FO Conformance] in the online manual.

Because 'axf:suppress-duplicate-footnote' is not specified in the second page, the same footnote is duplicated in the footnote region.
