

# Padding and border in a table

This shows an example of border and padding settings in a table. The colored area shows the border and the space between the border and text shows the padding.

## Auto Mode

border-width="0.2mm" padding="0mm"	border-width="0.2mm" padding="3mm"
------------------------------------	------------------------------------

border-width="1.5mm" padding="0mm"	border-width="1.5mm" padding="3mm"
------------------------------------	------------------------------------

border-width="5.0mm" padding="0mm"	border-width="5.0mm" padding="3mm"
------------------------------------	------------------------------------

border-width="2.0mm" padding="0mm"
------------------------------------

border-width="2.0mm" padding="1mm"
------------------------------------

border-width="2.0mm" padding="2mm"
------------------------------------

border-width="2.0mm" padding="5mm"
------------------------------------

## Fixet Mode inline-progression-dimension="40%" table-layout="fixed"

border-width="2.0mm" padding="0mm"
------------------------------------

border-width="2.0mm" padding="1mm"
------------------------------------

border-width="2.0mm" padding="2mm"
------------------------------------

border-width="2.0mm" padding="5mm"
------------------------------------
