

# Adding a “continued” indicator when a table is split

By using `<fo:marker>` and `<fo:retrieve-table-marker>`, you can display a specified character string at the point where a table is split across two pages. This sample shows “continued” before and after the point where the page split occurred.

| Product type   | Item   | Item Details   |
|----------------|--------|--|
| Product type 1 | Item A | Item A Details 0<br>Item A Details 1<br>Item A Details 2<br>Item A Details 3<br>Item A Details 4<br>Item A Details 5<br>Item A Details 6 |

**continued.....**

.....continued

| Product type   | Item   | Item Details   |
|----------------|--------|--|
|                |        | Item A Details 7<br>Item A Details 8   |
| Product type 2 | Item B | Item B Details 0<br>Item B Details 1<br>Item B Details 2<br>Item B Details 3<br>Item B Details 4<br>Item B Details 5<br>Item B Details 6<br>Item B Details 7 |
