

Adding a “continued” indicator when a table is split

By using `<fo:marker>` and `<fo:retrieve-table-marker>`, you can display a specified character string at the point where a table is split across two pages. This sample shows “continued” before and after the point where the page split occurred.

| Product type | Item | Item Details |
|----------------|--------|--|
| Product type 1 | Item A | Item A Details 0 Item A Details 1 Item A Details 2 Item A Details 3 Item A Details 4 Item A Details 5 Item A Details 6 |
