

Column span & row span

The table column can be spanned in horizontal direction by 'number-columns-spanned', the table row can be spanned by 'number-rows-spanned' in vertical direction. Both can be specified at the same time.

This is an example of column span in a table.

1-1	1-2	1-3	1-4
number-columns-spanned="2"		2-3	2-4
number-columns-spanned="3"			3-4
number-columns-spanned="4"			
5-1	number-columns-spanned="2"		5-4

This is an example of row span in a table.

1-1	number-rows-spanned="2"	number-rows-spanned="5"	1-4
2-1			number-rows-spanned="3"
3-1	3-2		
4-1	4-2		
5-1	5-2		5-4

This is an example of column span and row span specified together in a table.

1-1	number-columns-spanned="2"		1-4
2-1	number-rows-spanned="2"		2-4
3-1	3-2	3-3	3-4
4-1	number-columns-spanned="3"		
5-1	number-rows-spanned="2"
